

U.S. Patent Application Serial No. 09/763,049
Amendment Under 37 C.F.R. § 1.114 dated April 6, 2007
Reply to Official Action dated April 6, 2006

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Claims 16, 18, 22, and 23 are amended and claims 24-33 are newly added.

Listing of Claims:

1.-15. (Cancelled).

16. (Withdrawn - Currently Amended) A kit, comprising:

- (a) at least one sheet according to claim 18 ~~multiple substrates with the fabric shrinkage reducing composition and the liquid cleaning/refreshment composition according to Claim 1 releasably absorbed therein;~~
- (b) a re-usable containment bag;
- (c) optionally, a treatment member;
- (d) optionally, a separate portion of a spot cleaning composition; and
- (e) optionally, one or more absorbent stain receiver articles.

17. (Withdrawn) The kit according to claim 16, wherein the separate portion of the spot cleaning composition is provided in a container, and the treatment member is the tip of the container.

18. (Currently Amended) A sheet which is specifically adapted to clean and/or refresh fabrics in a hot air apparatus, the sheet comprising:

- (a) a substrate comprising a surface area from about 360 cm² to about 3000 cm²;

U.S. Patent Application Serial No. 09/763,049
Amendment Under 37 C.F.R. § 1.114 dated April 6, 2007
Reply to Official Action dated April 6, 2006

- (b) from about 10 grams to about 30 grams of a liquid cleaning/refreshment composition comprising at least about 80% by weight, of water releasably absorbed in the substrate; and
- (c) from about 2 grams to about 20 grams of a fabric shrinkage reducing composition comprising a fabric shrinkage reducing agent selected from the group consisting of: ethylene glycol, all isomers of propanediol, butanediol, pentanediol, hexanediol and mixtures thereof releasably ~~releasable~~ absorbed in the substrate.
19. (Previously Presented) The sheet according to claim 18, further comprising a permeable fibrous coversheet which encases the outer surfaces of the core element.
20. (Previously Presented) The sheet according to claim 18, wherein the cleaning/refreshment composition comprises up to about 2%, by weight, of a nonionic surfactant.
21. (Previously Presented) The sheet according to claim 19, wherein the fibrous coversheet is vapor permeable to the cleaning/refreshment composition and the fabric shrinkage reducing composition; wherein the coversheet has a minimum thickness of at least about 8 mils.
22. (Currently Amended) The sheet according to claim 21, wherein the coversheet is bonded to the substrate ~~coversheet~~ in discrete areas.
23. (Currently Amended) The sheet according to claim 18, wherein the ~~liquid absorbing~~ substrate is a hydroentangled fabric.
24. (New) The sheet according to claim 18, wherein the cleaning/refreshment composition comprises a nonionic surfactant.

U.S. Patent Application Serial No. 09/763,049
Amendment Under 37 C.F.R. § 1.114 dated April 6, 2007
Reply to Official Action dated April 6, 2006

25. (New) The sheet according to claim 18, wherein the cleaning/refreshment composition comprises an ethoxylated alcohol or a ethoxylated alkyl phenol.
26. (New) The sheet according to claim 18, wherein the cleaning/refreshment composition comprises a glycol ether.
27. (New) The sheet according to claim 18, wherein the cleaning/refreshment composition comprises a butoxy propoxy propanol.
28. (New) The sheet according to claim 18, wherein the fabric shrinkage reducing agent is neopentyl glycol.
29. (New) The sheet according to claim 18, wherein the fabric shrinkage reducing agent is 1,2 propanediol.
30. (New) The sheet according to claim 18, wherein the ratio of the fabric shrinkage reducing composition to the liquid cleaning/refreshment composition ranges from about 1:2 to about 1:5.
31. (New) The sheet according to claim 18, wherein the ratio of the fabric shrinkage reducing composition to the liquid cleaning/refreshment composition is about 1:3.6.
32. (New) A sheet comprising:
- (a) a substrate comprising a surface area from about 360 cm² to about 3000 cm²;

U.S. Patent Application Serial No. 09/763,049
Amendment Under 37 C.F.R. § 1.114 dated April 6, 2007
Reply to Official Action dated April 6, 2006

(b) from about 10 grams to about 30 grams of a liquid cleaning/refreshment composition comprising at least about 80% by weight, of water releasably absorbed in the substrate; and

(c) from about 2 grams to about 20 grams of a fabric shrinkage reducing composition comprising a fabric shrinkage reducing agent selected from the group consisting of: ethylene glycol, all isomers of propanediol, butanediol, pentanediol, hexanediol and mixtures thereof releasably absorbed in the substrate;

with the proviso that the sheet does not include 1,2-octanediol.

33. (New) A sheet which is specifically adapted to clean and/or refresh fabrics in a hot air apparatus, the sheet comprising:

- (a) a substrate comprising a surface area from about 360 cm² to about 3000 cm²;
- (b) from about 10 grams to about 30 grams of a liquid cleaning/refreshment composition comprising at least about 80% by weight, of water releasably absorbed in the substrate; and
- (c) from about 2 grams to about 20 grams of a fabric shrinkage reducing composition comprising a fabric shrinkage reducing agent selected from the group consisting of: ethylene glycol, all isomers of propanediol, butanediol, pentanediol, hexanediol and mixtures thereof releasably absorbed in the substrate;

wherein the sheet is designed to be used in vapor-venting containment bags that have a VVE score ranging from about 40% to about 90%.
